Fixed Account: 2%; **Indexed Accounts:** 0% or 1%, selected by client at time of application. May also receive Indexed Interest Credits, based on changes in the S&P 500®.³

Not applicable.

Life Plus Accelerated Death Benefit Rider⁴

An Accelerated Death Benefit (ADB) rider providing the flexibility of accessing a portion of the death benefit of a life insurance policy before the insured dies.

Issue ages: 0–79. Subject to base product's specified minimum and maximum ages.

Restricted by the minimums and maximums required by the policy to which it is attached.

If insured is eligible, automatically added in approved states to all UL and term policies. Allows advance against the death benefit if one of the following three criteria is met as defined in the rider:

- 1) Diagnosis of a rider-specified medical condition (Critical Illness in CA; Specified Medical Condition not available in CA)
- 2) Chronic Illness⁵
- 3) Diagnosis of a Terminal Illness

The qualifying terms and conditions for accessing accelerated benefits vary by state.

In addition to our current underwriting practices, Chronic Illness underwriting guidelines will be used to determine eligibility. Insureds who do not meet the underwriting standards will receive the ADB Plus or ADB rider (subject to state availability.)

In some states, benefits are not available during the contestable period of the policy, as defined by the state of issue. In most states, benefits are not available for Chronic Illness until after the second policy anniversary, as defined by the state of issue. Product and rider provisions, availability, definitions and benefits may vary by state. Check your illustration for state variations.

Advances under this rider will reduce the availability of discretionary loans. However, the available advance under this rider will always exceed the cash value (and available loan) under the policy to which it is attached.

Advances under this rider will reduce the availability of discretionary withdrawals. However, the available advance under this rider will always exceed the cash value (and available withdrawal amount) under the policy to which it is attached.

This rider is added at no additional premium; however, we may charge a fee of up to \$250 (state variations may apply) for an advance. An advance is treated as a lien secured by the death benefit of the policy. The advance will accrue interest each year. The rate of interest will depend on the cash value of your policy and may vary as required by the laws of your state. The lien may be increased if necessary to keep the policy in effect.

Not Applicable.

Not Applicable.

⁴ Availability of Accelerated Death Benefit Riders varies by state and product.

⁵ Certain medical histories may prevent qualification for Accelerated Death Benefit Life Plus Rider. Insureds who do not qualify for the Life Plus Accelerated Death Benefit Rider will receive either the Accelerated Death Benefit Plus Rider or the Accelerated Death Benefit Rider. In most states there is a two-year waiting period for all Chronic Illness claims so that no benefit is paid prior to the second policy anniversary.

Living benefits are accessed through an advance of the policy's death benefit, provided the insured meets eligibility requirements under the applicable rider. An advance is treated as a lien against the policy and will reduce the Death Benefit payable if not repaid. The advance will accrue interest each year. The lien may be increased if necessary to keep your policy in effect. We may charge a fee of up to \$250.00 for an advance payment. The accelerated death benefit will terminate with the policy.

Life insurance proceeds paid in the form of an accelerated death benefit when the insured has become chronically or terminally ill, and is otherwise eligible for benefits, are intended to receive favorable tax treatment under Section 101(g) of the Internal Revenue Code (26 U.S.C. Sec. 101(g)). There may be tax consequences in some situations in accepting an accelerated benefit payment amount. Consult your tax advisor before taking an advance.

This is a life insurance benefit that also gives you the option to accelerate some or all of the death benefit in the event that you meet the criteria for a qualifying event described in the policy. This policy does not provide long-term care insurance subject to California long-term care insurance law. This policy is not a California Partnership for Long-Term Care program policy. This policy is not a Medicare Supplement policy.

Product features differ between long-term care insurance and life insurance accelerated death benefit riders. Accelerated death benefit riders pay an unrestricted advance of a portion of the life insurance death benefit when the insured experiences terminal or chronic illness as defined in the rider. You do not have to show incurred care expenses associated with an accelerated death benefit. The maximum benefit payable is based on the policy's cash value and face amount. Any advance paid will reduce the death benefit of the policy. Long-term care policies or riders, on the other hand, pay benefits based on expenses incurred by the policyholder for long-term care. The total benefits available for long-term care insurance are selected by the policyholder at issue. Long-term care insurance is a stand-alone insurance policy or a rider designed to pay for the cost of long-term care services. Long-term care insurance may include coverage for such qualifying events as institutional care, care in a nursing home or skilled nursing facility, home care coverage, hospice care, respite care, or community care.

Receipt of Accelerated Benefit payments may adversely affect the recipient's eligibility for Medicaid or other government benefits or entitlements. They may also be considered taxable by the Internal Revenue Service. You should contact your personal tax advisor for assistance.

IUL and SIUL are UL policies. They have insurance related costs. Premiums paid must produce sufficient cash value to pay insurance charges. Indexed returns do not protect against lapse if premiums and returns do not provide sufficient cash value to cover loan interest and insurance costs. Your clients must understand that loan risk means loans may well not be zero cost. Such loan risk and interest costs will reduce account value and will contribute to a risk of policy lapse if account value becomes insufficient to cover charges.
